**FACULTY OF ENGINEERING AND TECHNOLOGY**  
**PARUL INSTITUTE OF TECHNOLOGY**  
**AZURE FUNDAMENTALS (203105376)**

**Submission Date:05/07/2024**

**Assignment: Unit1 and Unit2**

1. **What is the main advantage of cloud computing for organizations?**

- A) High cost of data storage
- B) Slow data processing
- C) Flexibility and cost-effectiveness
- D) Limited access to resources

2. **Which of the following is an example of an IaaS provider?**

- A) Microsoft Word
- B) Google Docs
- C) Microsoft Azure
- D) Zoom

3. **Which of the following is a real-world application of cloud computing?**

- A) Local file storage
- B) Online data storage
- C) Manual data processing
- D) Standalone software installation

4. **What is a key use case of Azure Kubernetes Service (AKS)?**

- A) Managing keys and secrets
- B) Simplifying the deployment and management of Kubernetes
- C) Hosting relational databases
- D) Providing high-performance block storage

5. **Which service facilitates secure communication between Azure resources?**

- A) Azure SQL Database
- B) Azure Functions
- C) Azure Virtual Network (VNET)
- D) Azure Data Box

1. Which of the following type of cloud has least security?

- a) Public
- b) Private
- c) Hybrid
- d) Community

2. Which of the following is a “http” type of service?

- a) Azure Compute
- b) Azure Networking
- c) Azure Storage
- d) Azure App Hosting

3. Which of the following types of cloud computing model provides with a GUI and API based interface?

- a) SaaS
- b) PaaS
- c) IaaS
- d) XaaS

4. Which of the following is for testing, developing, run and managing Apps?

- a) SaaS
- b) PaaS
- c) IaaS
- d) XaaS

5. What creates the Virtual Machines?

- a) Hypervisor
- b) Orchestrator
- c) Fabric Controller
- d) Switching Network

### **Short Answer Questions**

1. Explain the key characteristics of a public cloud model?
2. How to Create a Virtual Machine in Azure?
3. Explain how Availability Zones and Azure Regions operate?
4. Explain the key characteristics of a public cloud model?
5. What does the term 'pay-per-use' mean in cloud computing?
6. Write name of any three Storage services in Azure and their use cases.
7. What is Azure Virtual Machine?
8. What is Azure App Service?
9. How to Create a Virtual Machine in Azure?
10. Explain how Availability Zones and Azure Regions operate?
11. Explain the three AI and Machine Learning services in Azure.
12. Explain the key characteristics of a public cloud model?
13. What does the term 'pay-per-use' mean in cloud computing?
14. Write name of any three Storage services in Azure and their use cases.
15. What is Azure Virtual Machine?
16. What is Azure App Service?

### **Long answer Questions**

17. Describe the evolution of cloud computing, from client/server computing to the cloud services offered today?
18. How to Create a Virtual Machine in Azure?
19. Explain how Availability Zones and Azure Regions operate?
20. Outline and explain the three models of cloud computing. What is meant by the concepts of 'stack' and 'layered architecture' in this context?
21. Explain the data storage options available in Azure, such as Azure Blob Storage, Azure SQL Database, and Azure Cosmos DB.
22. Explain the three AI services in Azure.
23. Explain the data storage options available in Azure, such as Azure Blob Storage, Azure SQL Database, and Azure Cosmos DB.
24. Outline and explain the three models of cloud computing. What is meant by the concepts of 'stack' and 'layered architecture' in this context?
25. Describe the evolution of cloud computing, from client/server computing to the cloud services offered today?
