UNIT-3
QUESTION BANK

1. Find the number that must be added to the terms of the ratio 11:29 to make it equal to 11:20.
2. Find a fourth proportional to the numbers 60, 48, 30.
3. An amount of `1200 is distributed among A, B and C in the ratio of 5:7:13. What is the difference between the shares of C and B?
4. Amit, Sumit and Puneet share an amount of Rs. 660 in the ratio of 3:4:5. What is the share of Puneet?
5. The mean proportional between 64 and 81 is_____
6. If $A:B = 7:5$ and $B:C = 9:11$, then $A:B:C$ is equal to_____
7. The ratio of money with Anju and Sanju is 4:5 and that with Sanju and Manju is 5:6. If Anju has Rs. 280, then the amount of money Manju has_____
8. In a mixture of 60 litres, the ratio of milk and water is 2:1. What amount of water must be added to make the ratio of milk and water as 1:2?
9. One year ago the ratio between Samir and Ashok's age was 4:3. One year hence the ratio of their ages will be 5:4. What is the sum of their present ages in years?
10. The sum of the ages of a son and father is 56 years. After four years, the age of the father will be three times that of his son. Find their respective ages.
11. Three numbers are in the ratio of 3:4:8 and the sum of these numbers is 975. Find the three numbers.
12. Two numbers are in the ratio of 4:5. If the difference between these numbers is 24, then find the numbers.
13. Four year ago average age of P, Q and R is 33 years. At present, age of R is three years less than Q and P is three year older than Q. Then find the age of P one year hence ?
14. The ratio of the age of father and son at present is 6:1. After 5 years, the ratio will become 7:2. Find the present age of the son.
15. Michelle got married 9 years ago. Today her age is $1\frac{1}{3}$ times her age at the time of marriage. At present her daughter's age is $\frac{1}{6}$ of her age. What was her daughter's age 2 years ago?
16. The population of a town increases 5% annually. If its present population is 84000, what will it be in 2 years time?
17. The Population of a town increases at the rate of 5% annually. If the present population is 4410, what it was 2 years ago?
18. If the price of sugar increases by 25%, find how much per cent its consumption be reduced so as not to increase the expenditure.
19. If the price of a commodity decreases by 25%, find how much per cent its consumption be

- increased so as not to decrease the expenditure.
20. $x\%$ of $y + y\%$ of $x = ?$
 21. The ages of 3 brothers are in a ratio 3:5:11. If the difference between the ages of the youngest and the eldest brother is 24 years, find the total of their ages.
 22. 6 years ago Mahesh was twice as old as Suresh. If the ratio of their present ages is 9:5 then, what is the difference between their present ages?
 23. Eighteen years ago, the ratio of A's age to B's age was 8:13. Their present ratio's are 5:7. What is the present age of A?
 24. The sum of the ages of two brothers, having a difference of 8 years between them, will double after 10 years. What is the ratio of the age of the younger brother to that of the elder brother?
 25. In a family, mother's age is twice that of daughter's age. Father is 10 years older than mother. Brother is 20 years younger than his mother and 5 years older than his sister. What is the age of the father?
 26. 75% of 400 = ?
 27. If 12% of x is equal to 6% of y , then 18% of x will be equal to how much per cent of y ?
 28. The population of a city increases at the rate of 10% annually. Its present population is 90.51 lacs. Find the approximate population 3 years ago.
 29. 75% of 480 = $(?) \times 15$
 30. The population of a town increases at the rate of 5% annually. If the present population is 4410, what it was 2 years ago?
